## LINENS!

Nowhere about the house can a woman show her discriminating taste more plainly than in her table linens. A dining table instantly loses its attractiveness if there is the faintest suspicion about the linen. So too with towels, lureau searfs, etc., in the guest room. Such points are sometimes overlooked by busy housewives and for this reason today we call especial attention to the Linens. Every lest loom is represented in our stock and many patterns are exclusively our own. As in other departments a wide price range, with qualities absolutely safe.

## Does Your Baking Powder Contain Alum ?

Prof. Geo. F. Barker, M.D., University of Prof. Geo. F. Barker, M.D., University of Penn.: "All the constituents of alum remain (from alum baking powders) in the bread, and the alum itself is reproduced to all intents and purposes when the bread is dissolved by the gastric juice in the process of digestion. I regard the use of alum as highly injurious."

Dr. Alonzo Clark: "A substance (alum)

Dr. Alonzo Clark: "A substance (alum) which can derange the stomach should not be tolerated in baking powder."

Prof. W. G. Tucker, New York State Chemist: "I believe it (alum) to be decidedly injurious when used as a constituent of food articles."

Prof. S. W. Johnson, Yale College: "I regard their (alum and soluble alumina salts) introduction into baking powders as most dangerous to health."

In view of such testimony as this, every care must be exercised by the housewife to exclude the over and over condemned cheap, alum baking powders from the food.

Baking powders made from cream of tartar, which is highly refined grape acid, are promotive of health, and more efficient. No other kind should be used in leavening food. Royal Faking Powder is the highest example of a pure cream of tartar powder.
